

## How to run the application.

### Run on PC

1. Go to [Bluestacks](#) and click on Download App Player. Click on the download button for [Windows](#) on the left or [Mac](#) on the right.  
Download the installer from the [official Bluestacks website](#).
2. Now open the setup file and follow on-screen instructions to install Bluestacks. The instructions are straightforward, similar to installing any other program on your computer.
3. Run Bluestacks when the installation is complete. You might see a notification saying that your graphics driver needs to be updated. Just click the "Close" button when you see the pop-up to start Bluestacks.
4. Now you'll see a window in which Android is up and running. Click the big search icon at the top > type the name of the app > select "Search Play for..." to get the apps from Google Play.
5. Installing apps is simple. Just use the apk file provided and install it into Bluestack you can click "Install" to get the app.
6. Bluestacks has an [Android app](#) so you can sync installed apps between your PC and Android device if needed.
7. Bluestacks is free for a short duration (half an hour), after which it asks you to pay \$2 (roughly Rs. 120) per month; or you can instead install some sponsored apps every day. That's not a big dampener as you don't need to open the sponsored app and you can easily delete it right after installation is complete. To do this, click the All-apps icon at the top > Settings > Apps. Now select the sponsored app and click the "Uninstall" button.

### Run on real Android Device.

1. Download the given apk file and install into real android device.
2. Open app and provide the required inputs.
